

Announcement from ASM

“Molecular Diagnostics of Infectious Diseases: A Practical Course for Clinical Laboratorians and Healthcare Providers”

ASM invites you to participate in an upcoming course, “Molecular Diagnostics of Infectious Diseases: A Practical Course for Clinical Laboratorians and Healthcare Providers”. Over the years, the development and application of molecular techniques has revolutionized the diagnosis and monitoring of infectious diseases. This beginner’s course is intended to provide an introduction to basic molecular methods, approaches to laboratory design, optimizing workflow, and more!

The course includes nine webinars, each with a pre- or post-activity to enhance the impact of the presentation. Registration includes access to the live event and unlimited access to the recorded presentation for up to twelve months after the live event. Live webinars will be presented on Wednesdays at 2:00 p.m. (EST) starting October 12, 2016. Each topic is available for P.A.C.E.®, California, and Florida continuing education credits.

Register for singular topics for \$30 or save money and purchase all nine topics for \$250! Visit the [course website](#) to learn more.

Feel free to contact clinmicro@asmusa.org with any questions. Thank you, Peggy McNult
